

# CARBON DRIVE™

## THE CARBON DRIVE™ SYSTEM

### ENGINEERED TO CHANGE THE WAY THE WORLD RIDES

Gates revolutionary Carbon Drive™ System is setting new standards for mountain and commuter bikes. A strong, polyurethane synchronous belt and lightweight sprockets combine to create a clean, quiet, no-maintenance and debris resistant technology that performs smoothly and lasts long.

From the ribbed belt backing that reduces bending friction and maximizes system efficiency, to the sprockets' Mud Ports™ that systematically slough off debris, no detail was missed during design.
