

CARBON DRIVE™

THE WORD ON THE STREET... AND FROM THE TRAIL

WHAT RIDERS HAVE TO SAY ABOUT THE REVOLUTIONARY TECHNOLOGY

“The belt drive was perfect. I don’t even have to think about it. I just ride. I have no mechanical problems. I don’t need tools or extra parts. **It’s all right there and works.** And it’s completely quiet, **which is great.**”

– *Cristina Begy*

“Never having to worry about a link breaking brings great **peace of mind**, especially on a single speed... I think that the belt drive system could **revolutionize bikes**, especially townies and commuter bikes, since people just want to go and not deal with any type of maintenance.”

– *Alex Coleman*

“I found myself aboard a Spot Brand Longboard starting my mountain bike season at ‘The 24 hours in the Old Pueblo.’ The day started out with snow, progressed to mud and finally offered full-on hero dirt as the hours and miles ticked off. It was an introduction to a season that would yield over 20+ mountain bike races and countless rides aboard the system. Honestly, **my experience has been flawless** in terms of mechanical performance.”

– *Chad Melis*

“I’ve been **racin**g single speed mountain bikes for about five years now. **This year was the best** with my belt drive. After a few rides I had full confidence in the system. Never did I worry about breaking a belt... Getting the bike ready for race day was a breeze. Just wash it off. No hours spent cleaning the chain. **The belt is smooth, silent and reliable.**”

– *Travis Lukens*

“I built up my new single speed street bike with the belt drive system. **Wow!** Smooth, silent, stealthy. All I hear is rubber on asphalt and wind in my ears. Low/no maintenance, and no grease on my leg! **It is a continual pleasure.** How did I live without a belt drive all these years?”

– *Eric Weis*
